with Forward Wheels

FSA Series

SINGLE INLET CENTRIFUGAL FAN with Forward Wheels

Kruger Ventilation Industries certifies that the **FSA series : version S, C, T and U - model 200 to 1000** shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA publication 211 and AMCA publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The AMCA Certified Ratings Seal applies to air performance and sound for **models FSA 200 to 1000** only. The AMCA Certified Ratings Seal applies to FEG for **models FSA 225 to 1000** only.

FSA Series

Single Inlet Forward Curved Centrifugal Fans

The FSA series is SISW centrifugal fans with forward curved impellers. The fans are suitable for supply or exhaust applications in commercial, process and industrial HVAC systems.

Sizes of this series are in accordance with AMCA standard 99-0098-76 R20.

Type

The FSA series is available in type S, C, T or U as shown in Fig. 1:-

Type S	Type C	Type T	Type U
 This type is supplied with mounting feet and can be mounted in three different fan orientations. Inlet flange 'L' and outlet flange are supplied as standard Size: 200 to 450 Vol.: 800 to 8000 m³/h Total Press.: up to 1600 Pa.	 This type has a frame fitted on both sides of the fan which gives better strength and rigidity and allows mounting in four different orientation. Size: 200 to 630 Vol.: 800 to 18000 m³/h Total Press.: up to 1600 Pa	 This type has a welded frame, giving increased stiffness and rigidity required for higher operating performance. Size: 315 to 1400 Vol. : 3000 to 80000 m³/h Total Press. : up to 2000 Pa Performance of 1120, 1250 & 1400 are not AMCA licensed.	 This type is manufactured with a special frame with two bearing fixed externally to the airflow eliminating any obstruction to the inlet and allow operation with air temperature up to max. of 180°C. Size: 315 to 1400 Vol.: 3000 to 80000 m³/h Total Press.: up to 2000 Pa Performance of 1120, 1250 & 1400 are not AMCA licensed.

Fig.1

Technical Specifications

Wheel

The wheel of FSA series is made of galvanised sheet steel forward curved blades.

Housing

For all sizes except 1250 and above, the housing is manufactured in galvanized sheet steel with the housing fixed to the side plates in "pittsburg lock" form system.

Housings for 1250 and 1400 are manufactured in mild steel finished with polyester powder coating.

Frame

The frame is manufactured with galvanized angular bars for type "C". For type "T" and "U", they are manufactured with sections of steel and finished with polyester powder coating.

Bearings

Bearings used are either deep groove ball bearing type with an eccentric locking collar or an adapter sleeve, or spherical roller bearings type sealed at both sides for different duty application.

For type "S" and "C", they are mounted in a rubber housing, whereas for type "T" and "U", they are mounted on cast iron supports with grease points.

Except TX, XX, UX extra heavy duty bearings, all bearings are lubricated for life and maintenance-free. If re-lubrication is necessary, it is recommended to use lithium base grease suitable for all temperatures within the operational limits.

Shaft

Shaft are manufactured from C45 carbon steel using an automatic process for positioning and cutting of the keyways. All dimensional tolerances of the shaft are fully checked to ensure a precision fit. All shafts are then coated with an anti-corrosion varnish after assembly.

Balancing Quality

All wheels are statically and dynamically balanced to ISO1940 or AMCA 204 – G2.5 standards.

All fans after assembly are trim-balanced to ISO1940 or AMCA 204 - G2.5 standard.

Clean room application fans with balancing grade of G1.0 are available upon request.

Accessories

Casing Drain

This option is available when using fans exposed to the atmosphere or operating in high humidity conditions.

Inspection Doors

The inspection door can be supplied upon request. It can be supplied in one of the three position (P3, P4 & P5) shown.

Outlet Flanges

Outlet flanges are available upon request. For more details, refer to page 32.

Inlet Flanges

This option are set against the fan to facilitate installation. It is available in 2 types -"L" flange or "U" flange. For more details, refer to page 32.

Fan Rotation and Discharge

The rotation and discharge of the fan is in accordance with AMCA standard 99-2406-83.
The direction of rotation is determined from the drive side of the fan [refer Fig. 2] :-

CW - clockwise rotation
CCW - counter-clockwise rotation

	90°	180°	270°	360°
CW				
CCW				

Fig. 2 - Fan rotation and discharge

Fig. 3 - Motor Position

Motor Position

The position of the motor for belt drive centrifugal fan is in accordance with AMCA standard 99-2407-66.

Location of motor is determined by facing the drive side of fan and designating the positions by letters W, X, Y, or Z. [refer to Fig.3]

Fig. 4 - Recommended for compensation

Motor Selection

The power curves shown on each performance graph represents the absorbed power at the shaft of the fan measured in kW.

To determine the power of the motor to be installed, a correction factors as shown in fig.4 should be applied to compensate for transmission losses:

For conversion to horsepower (HP), use multiplying factor 1.34.

Dynamic Pressure

Both dynamic pressure and outlet air velocity shown on each curve are calculated base on the full air discharge area - ducted outlet conditions.

With free outlet conditions the velocity pressure is higher. To determine this new value, multiply the velocity pressure of the ducted outlet obtained from the fan curve by the following correction factor, K.

Fan performances calculated with this correction factors are not licensed by AMCA.

$$[K = 2.6]$$

Performance

The performance data shown on each graph is derived from tests conducted in accordance to AMCA standard 210 Fig 12 – installation type B (free inlet and ducted outlet condition).

Ratings refer to the standard air density with the total pressure as a function of the air volume, using logarithmic scales.

It is essential that the same installation type and test standards are used at all times when comparing fan performances.

Noise

The noise level shown on each graph refer to the "A-weighted" sound power values and the data on the inlet side has been measured in accordance with AMCA Standard 300 diag. 2 - configuration "B". The noise levels of the fans are determined as follows :

- Sound power level - ("A" scale):
Lw (A) as catalogue
- Octave band spectrum:
Lw = Lw(A) + Lw rel. dB [refer to Kruger for more details]
- Sound pressure level:
 - a) free field
 $L_p(A) = L_w(A) - (20\log_{10}d) - 11$
 - b) room conditions
 $L_p(A) = L_w(A) - (20\log_{10}d) - 8$

where d = distance from fan (m)

Performance

The performance data shown on each diagram is derived from tests conducted in accordance to AMCA Standard 210- Fig 12- Installation type B (free inlet and duct outlet condition).

Ratings refer to standard air density with the total pressure as a function of the air volume, using logarithmic scale.

It is essential that, the same installation type and test standards are used at all times, when comparing fan performance.

According to AMCA 205, FSA series can be classify as FEG 53~67 based on fan peak efficiency. The following is the explanation of FEG classification:

1. Fan size is the impeller diameter in mm.
2. The fan peak efficiency shall be calculated from the fan (total) pressure.
3. If this method is used for a direct driven fan, the fan efficiency is the impeller efficiency.
4. The FEG label for a given fan size is assigned when the fan peak efficiency is equal or lower than the efficiency at the grade upper limit and higher than efficiency at the grade upper limit of the next lower grade for the fan size.
5. For any fan sizes larger than 1016 mm, the values of the grade upper limits are the same as for a size of 1016 mm.
6. No labels are considered for the fans with the fan peak total efficiency below FEG 50.
7. The values of efficiencies are calculated for fan sizes in the preferred R40 Series.
8. Not all fan sizes in preferred numbers shown.

Fan Efficiency Grades (FEG) for Fans without Drives (SI) – AMCA 205

Example of Reading

Air Volume	$Q = 8100 \text{ m}^3/\text{h}$
Outlet Velocity	$V = 10.95 \text{ m/s}$
Dynamic Pressure	$P_d = 71 \text{ Pa}$
Total Pressure	$P_t = 850 \text{ Pa}$
Fan Speed	$N = 921 \text{ rpm}$
Absorbed Power	$W = 3.3 \text{ kW}$
Total Efficiency	$\eta = 57.5 \%$
Sound Power Level	$L_w(A) = 87 \text{ dB(A)}$

FSA 500

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
 - The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 200

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 225

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 250

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 280

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 315

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lw(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 355

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 400

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 450

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lw(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 500

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 560

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 630

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 710

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 800

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 900

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 1000

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lw(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.

FSA 1120

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.
- MODEL FSA1120 IS NOT LICENSED TO BEAR THE AMCA CERTIFIED RATINGS SEAL.

FSA 1250

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.
- MODEL FSA1250 IS NOT LICENSED TO BEAR THE AMCA CERTIFIED RATINGS SEAL.

FSA 1400

- Performance shown is for Installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating kW does not include transmission losses.
- The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet $L_{wi}(A)$ sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections.
- MODEL FSA1400 IS NOT LICENSED TO BEAR THE AMCA CERTIFIED RATINGS SEAL.

Centrifugal Fan Ordering Information

Fan Details			
■ Fan type		☐ DIDW ☐ SISW	
■ Impeller type		☐ Forward Curved ☐ Backward Curved ☐ Others : _____ (Please State)	
■ Model & size e.g. FSA 560 C		☐ Model : _____ (If known)	
■ Drive type - belt, direct, coupling (if differ from standard)		☐ Belt ☐ Direct ☐ Coupling ☐ Others : _____ (Please State)	
■ Arrangement (1 & 3 for bare shaft fan; 4, 8 & 12 for complete with drive system)		☐ Bare fan ☐ Complete with drive system	
■ Rotation & Discharge e.g. CCW 270		☐ CW ☐ CCW ☐ 90 ☐ 180 ☐ 270 ☐ 360	
■ Motor position (refer to diagram) e.g. W		☐ W ☐ X ☐ Y ☐ Z	
■ Air Flow Rate		Q : _____ ☐ L/S ☐ m³/h ☐ m³/min ☐ m³/s ☐ cfm	
■ Pressure (static & total)		SP : _____ TP : _____ ☐ Pa ☐ mmH ₂ O ☐ inWG	
■ Fan RPM (if specified)		Max. : _____ Min. : _____	
■ Noise level		☐ dB ☐ dBA Lw : _____ Lp : _____ at Distance : _____ m ☐ free field ☐ room condition ☐ corner / wall	
■ Ambient temperature		☐ Temp. : _____ °C	
■ Air density, if differ from standard		☐ Density : _____ kg/m³ ☐ Altitude : _____ m	
Motor Details		Fittings Detail	
■ Power	☐ kW : _____ ☐ HP : _____	■ Accessories	☐ Inspection door ☐ Drain plug ☐ Flexible duct ☐ Inlet vane control
■ No. of Poles / RPM	☐ 2P ☐ 4P ☐ 6P ☐ 8P ☐ Others : _____ (pls state RPM)		☐ Vibration Isolators: ☐ Rubber ☐ Spring ☐ Floor-mount ☐ Ceiling-hang
■ Voltage	☐ 220V ☐ 415V ☐ 380V ☐ 440V ☐ 400V ☐ Others : _____		☐ Silencers : ☐ With pod ☐ Without pod ☐ Inlet ☐ Outlet ☐ Both inlet & outlet
■ Phase	☐ 1φ ☐ 3φ		☐ Counter-flanges : ☐ Flat ☐ L-type ☐ U-type ☐ Inlet ☐ Outlet
■ Frequency		Special Features	
■ Frame size	☐ IEC : _____ ☐ NEMA : _____ ☐ Others : _____	■ Other Requirements	☐ Painting ☐ Powder coating ☐ Hot-dipped galvanizing
■ Make, if specified	☐ Brand : _____ ☐ Mfr. : _____ ☐ Country : _____		☐ Spark-resistant ☐ Corrosion-resistant ☐ Heat-resistant, temp. _____ °C ☐ Smoke Spill, Max. temp. _____ °C for _____ Hr
